

Stefan Taitano

Minneapolis, MN | hello@stefantaitano.com | [linkedin.com/in/stefantaitano](https://www.linkedin.com/in/stefantaitano)

ServiceNow Developer and Technical Consultant experienced in supporting clients as a platform admin, developer, and architect. Proven expertise in managing end-to-end platform health, from leading platform upgrades and security hardening to designing and implementing high-value products like Software Asset Management (SAM). Skilled in collaborating with C-Suite stakeholders to define strategy, gather requirements, and drive continuous process improvement.

Skills

Coding: JavaScript, Python, Ruby, Bash, HTML, CSS, Git, GitHub, XML; ServiceNow Core Platform: SAM, CSM, HRSD, ITSM, CMDB, App Engine, Service Catalog, UI Builder, Service Portal

Experience

ServiceNow Developer, Thirdera-Cognizant, Minneapolis

Feb 2024 — Present

- Launched a Software Asset Management (SAM) program, projecting over \$10,000 in annual savings and eliminating 500+ hours of manual work by implementing ServiceNow SAM Pro and automating license discovery through integration with MICROSOFT SCCM, Intune, Microsoft 365, and Adobe.
- Ensured the success of the Software Asset Management (SAM) implementation by leading a CMDB cleanup initiative, reducing stale configuration item (CI) data by 50%.
- Led bi-annual platform upgrade from Washington DC to Xanadu, and from Xanadu to Zurich, achieving a flawless transition as measured by zero critical incidents and maintaining 100% platform uptime.
- Enhanced platform security posture, achieving a 50% reduction in security findings (from 150 to 75) and boosting the platform hardening score to 85% by implementing ServiceNow security best practices through Security Center.
- Collaborated with C-Suite stakeholders to define platform strategy, securing executive buy-in for new solutions by leading technical demos and successfully managing a critical Mainframe integration project.
- Managed the daily operational health of the platform, maintaining a 100% triaged and prioritized work backlog, by collaborating directly with the platform owner to execute all incidents and requests through a formal Agile SDLC.
- Enabled seamless operational continuity and accelerated future admin onboarding by authoring a comprehensive documentation library for complex, repeatable procedures, including manual (air-gapped) MID server upgrades, Azure certificate/secret renewals, and platform cloning/upgrade procedures.

Team Lead and Program Manager, U.S. Army, Various Locations

Oct 2015 — Feb 2024

- Led and mentored teams of up to 5 personnel in mission-critical operations. Managed all team programs, operations, and technical readiness, improving efficiency by designing and authoring a new technical documentation library.
